Induquim

For professional hygene and cleaning ...

+25

25 years of experience

Founded by **Jerónimo Arija**, **Induquim** started its business with 2 product divisions: Hospitality and Communal Facilities. Since then we have extended our products and services.

Hand-in hand with our clients

Studying the needs, always with our clients, and the will to continuously improve mean that **Induquim** develops efficient product and service solutions in the Cleaning and Hygiene sector.

Meeting all your needs

Directed by experts in every Professional Cleaning field, **Induquim's** product range offers the best solutions for each specific need.

Investment in R+D+i

With the highest technology, **Induquim R+D+i** develops new formulas, new products and new cleaning programmes to improve all of the results.

Economy in the processes

Induquim analyses the complete process to achieve savings in product consumables, energy, time, maintenance and durability... human resource efficiency.

... Why induquim ?

Induquim

Tailor made training courses

At **Induquim** we give Training Courses, sometimes requested by our clients, about the innovations and protocols regarding cleaning and hygiene products and processes to sector managers and professionals.

Comprehensive Programmes

Because each and every one of our clients is unique. Our experts, in each division, study the best solutions and the specific cleaning programmes for each client's circumstances.

European Technology

Induquim competes in the international market with Spanish technology, which is the benchmark for the national industry in both Professional Hygiene and Cleaning systems and patents.

Quality and the environment

Maximum quality and environmental care. **Induquim** not only strictly complies with the demands of the European Standards, rather it goes beyond them, being a reference in ecological products.

Why Induquim?

Because
our clients' success ...
... is our success

Induquim

A history of ...

1994

Induquim started

its business activity with the Hospitality and Communal Facilities divisions.

1995

Induquim extends

its offer by placing two more product ranges onto the market: Automobiles and Transport and Industry.

2000

New divisions

in the Food Industry, Industrial Laundry and Concentrated Products.
The ISO 9001 quality certificate is obtained, certified by AENOR.

2003

Cleaning and hygiene: keys to your hotel's reputation

Many people co-exist and move around hotels every day and that's why profound, detailed cleaning is of extreme importance. Many times disinfection is also required in some areas to eliminate bacteria that have been able to affect a specific environment or surface.

When a guest stays in a hotel, he or she expects good service, that the expectations are met or are even better than what he/she booked and to feel comfortable, at home. The bedroom, the bathroom and the facilities in the hotel must be clean and cared for, tidy and sanitised.

Hotel cleaning is really important: even though a thousand things are taken care of in an exceptional way, if the bathroom is not gleaming, the furniture and the surfaces are not perfectly clean or the sheets, towels and tablecloths are not impeccable and unstained, the reputation will be affected and the guest will not stay in the hotel again.

Induquim has a complete variety of products and systems aimed at cleaning, sanitising and disinfecting all the areas and elements in a hotel, and always adapted to the real needs demanded by the client.

- **Housekeeping**
- **Kitchens**
- **Laundry**

Housekeeping

Bedrooms, bathrooms and communal areas in a hotel

Induquim has a wide range of **"Ready to use"** high quality products to clean and disinfect all the areas in a hotel.

For the economy of scale processes, Induquim has developed the **Massplus® concentrated range**, studied to be the best alternative, both economically and ecologically, within the solutions that the professional cleaning and hygiene market offers for Housekeeping.

The use of concentrated products exponentially reduces the different logistics costs and substantially lowers carbon emissions. Moreover, the correct dosage of concentrated products with a precise and professional dilution system achieves direct profits in the cleaning process and in sustainable consumption.

- Reduction in the amount of waste products
- Economic benefits in transport and storage
- Exact dosages without product wastage
- Sustainability and respect for the environment
- Easy to use, handle and store

AG+
Concentrated ammonia cleaner
Especially suited to clean stoneware. Also apt for all types of surfaces that need to be cleaned except wood and untreated cork.

MG+
Concentrated multiuse cleaner
Product specially studied to effortlessly clean and remove dirt and grease.

FG+
Concentrated floor cleaner
Product suited to cleaning and polishing any surface, leaving a very pleasant and long-lasting fragrance.

BG+
Concentrated bath cleaner
Designed to clean, sanitize and remove residues in bathrooms.

Kitchens

Cleaning and disinfecting kitchens

Cleaning and disinfecting, like handling and storing food products, is essential to give a safe and quality service to your guests.

Induquim has a wide range of high quality **"Ready to use"** products to clean and disinfect kitchens. And to get greater profitability, **Induquim** has developed the **Massplus® range, products** studied to be applied in hotel and resort kitchens which, along with **Induquim**'s dosage equipment, make the advantages and benefits, both economic and in space, cost control and handling, very significant.

DG+
Concentrated degreaser
Highly concentrated product with great degreasing power.

HG+
Concentrated sanitizing cleaner
Suited to cleaning, sanitizing and deodorising environments with danger of contamination.

FG+
Concentrated floor cleaner
As in the Housekeeping area, the FG+ concentrated floor cleaner is apt to treat the typical kitchen surfaces in hotels.

Performance concentrated products Massplus®

Concentrated product 2 LITRES

Hotels

Smart Resort®, professional laundry

Exclusive system for resort and hotel complex linen

Innovative + Profitable + Balanced + Sustainable = Intelligent rest

A universal characteristic shared by hotels is cleanliness and whiteness. Whiteness donates luxury and sophistication and it is associated with purity and relaxation.

Induquim has created an innovative and exclusive washing system focused on treating hotel linen, sheets and towels that are constantly used and need special treatment.

The **Smart Resort®** washing system cares for the fabrics treated to generate total wellbeing for your guests and gets the best washing results with maximum savings, profitability and efficiency. Moreover, it respects the environment thanks to its exact dosage, to the noble components that it is made of and to the absence of abrasive, caustic products.

Hotels

Cell Resort
Micellar Detergent

Ionic Resort
Comprehensive efficiency ionic detergent

Oxy Resort
High and low temperature organic peroxide

Suax Resort
Complete neutralising softener

Nursing Homes

induquim

Cleaning and hygiene: the beginning of wellbeing

Cleaning and disinfecting in nursing and geriatric homes implies implementing protocols that are delicate and unavoidable, demanding and complex within professional cleaning. The complete sanitisation and disinfection of all parts of the centre:spaces, surfaces, utensils and objects mean that it is a sector with a high degree of exactitude.

Adapted furniture, beds with anti-fall systems, adaptors for washing in showers and many other elements in these types of facilities must be cleaned in a special way.

The residents are people with special characteristics that must be taken into account when establishing cleaning protocols.

The primordial and most important is that, given that they are people considered at risk and whose health is very often delicate and, therefore, more susceptible to contagion given their physical conditions, cleaning must be constant and efficient.

Induquim has a complete variety of products and systems aimed at cleaning and disinfecting all the areas and elements in nursing homes for the elderly.

- **Housekeeping**
- **Kitchens**
- **Laundry**

Housekeeping

Bedrooms, bathrooms and communal areas in nursing homes

Induquim has thought about the elderly and that is why it has a wide range of products and systems to achieve the best possible results. All of the areas to be cleaned in a nursing home have been carefully studied and examined by **Induquim**'s technical development team in order to offer the best possible products to obtain the residents' maximum satisfaction.

To get total satisfaction for the residents and relatives in a nursing home, Induquim proposes profitable and sustainable cleaning with **"Ready to use"** products manufactured with the noblest raw materials or with concentrated products from the **Massplus® range**.

Induquim's Massplus® range of concentrates is studied to be an alternative, both economically and ecologically, within the solutions offered in the professional cleaning and hygiene market within the needs of Housekeeping.

AG+

Concentrated ammonia cleaner

Especially suited to clean stoneware. Also apt for all types of surfaces that need to be cleaned except wood and untreated cork.

MG+

Concentrated multiuse cleaner

Product specially studied to effortlessly clean and remove dirt and grease.

FG+

Concentrated floor cleaner

Product suited to cleaning and polishing any surface, leaving a very pleasant and long-lasting fragrance.

BG+

Concentrated bath cleaner

Designed to clean, sanitize and remove residues in bathrooms.

Kitchens

Cleaning and disinfecting kitchens

Handling and storing food products in a nursing home requires special care, a safe and quality service for the residents who, sometimes, have delicate health.

The kitchens require products that ensure correct cleaning, hygiene and disinfection and prevent risks for the residents.

Induquim proposes profitable and sustainable cleaning with "**Ready to use"** products manufactured with the noblest raw materials or with concentrated products from the **Massplus® range,** with clear usage and storage advantages.

DG+
Concentrated degreaser
Highly concentrated product with great degreasing power.

HG+
Concentrated sanitizing cleaner
Suited to cleaning, sanitizing and deodorising environments with danger of contamination.

FG+
Concentrated floor cleaner
As in the Housekeeping area, the FG+ concentrated floor cleaner is apt to treat the typical kitchen surfaces in Nursing Homes.

Performance concentrated products Massplus®

Concentrated product 2 LITRES

AG+, BG+, FG+ and HG+ : **400** buckets of 5 litres of detergent
DG+ and MG+ : **600** buckets of 5 litres

Smart Care®, professional laundry

Induquim has an exclusive washing system for linen in nursing homes.

Innovative + Profitable + Balanced + Sustainable = Intelligent care

Removes stains and dirt that are common in the fabrics in Nursing Homes and Centres for the Elderly: blood, body fluids, excrements, etc.

The **Smart Care®** system washes and treats the fabrics respecting and caring for the most delicate skins thanks to its low abrasive components and exact dosages. Facilitates the resident's wellbeing and prevents common problems like postural ulcerations due to prolonged decubitus.

Very profitable system that achieves great economic benefits with savings in water, time, energy, exact quantity of product, without wastage and respects the environment.

Fancy Care
Low alkaline active detergent

Aloe Care
Moisturising detergent with Aloe Vera

Suax Care

Cleaning and hygiene: comfort aboard

Unlike hotels, cruises are always an activity for pleasure and relaxation in which the passengers spend most of their holiday time on board the ship and the services have to be extraordinary.

This is where professional cleaning and hygiene adapted to the great and demanding needs of the sector come into play.

In order to achieve customer loyalty, the cleaning and hygiene in all the areas included in a cruise are fundamental.

Induquim has developed a complete range of **Massplus® concentrated products and systems** aimed at cleaning and disinfecting all the areas of a cruiser that are adapted to the limitations of space and transport with maximum quality.

Performance concentrated products Massplus®

Concentrated product 2 LITRES

Dilution system  Induquim

AG+, BG+, FG+ and HG+ : **400** buckets of 5 litres of detergent
DG+ and MG+ : **600** buckets of 5 litres

Housekeeping

Cabins, bathrooms and communal areas on cruisers

Induquim has a wide range of **"Ready to use"** high quality products to clean and disinfect all the areas on a cruiser. In this case, with little space and volume limitations and transported weight, Induquim has developed the **Massplus® concentrate range**, studied to be the best alternative, both economically and ecologically, within the solutions offered in the professional cleaning and hygiene market for cruiser Housekeeping.

The use of concentrated products exponentially reduces the different logistics costs and substantially lowers carbon emissions. Moreover, the correct dosage of concentrated products with a precise and professional dilution system achieves direct profits in the cleaning process and in sustainable consumption.

- Reduction in the amount of waste products
- Economic benefits in transport and storage
- Exact dosages without product wastage
- Sustainability and respect for the environment
- Easy to use, handle and store

AG+
Concentrated ammonia cleaner
Especially suited to clean stoneware. Also apt for all types of surfaces that need to be cleaned except wood and untreated cork.

MG+
Concentrated multiuse cleaner
Product specially studied to effortlessly clean and remove dirt and grease.

FG+
Concentrated floor cleaner
Product suited to cleaning and polishing any surface, leaving a very pleasant and long-lasting fragrance.

BG+
Concentrated bath cleaner
Designed to clean, sanitize and remove residues in bathrooms.

Kitchens

Cleaning, sanitisation and disinfection of kitchens on cruisers

The gastronomy on a cruise is one of the differentiating services that the shipping companies use in their marketing. Cleaning and disinfecting the kitchens is an essential requirement to give a safe, quality service to the passengers. That's why the different areas must be carefully cleaned and disinfected. Handling and storing food products is a critical point that a lot of attention must be paid to.

Induquim, has introduced, within its **Massplus® range, products** that have been specially studied to be applied in the kitchens on cruisers, along with Induquim's dosage equipment, make the advantages and benefits, in space, handling and storage within the kitchen, very significant.

DG+
Concentrated degreaser
Highly concentrated product with great degreasing power.

HG+
Concentrated sanitizing cleaner
Suited to cleaning, sanitizing and deodorising environments with danger of contamination.

FG+
Concentrated floor cleaner
As in the Housekeeping area, the FG+ concentrated floor cleaner is apt to treat the typical kitchen surfaces in cruiser linen.

In addition to the specially studied concentrated products to achieve optimal profitability and benefit, Induquim also has a range of **"Ready to use"** high quality products for any cleaning area.

induquim

Smart Cruise®, professional laundry

Exclusive system for cruiser linen

Innovative + Profitable + Balanced + Sustainable = Intelligent rest

Another characteristic about cruisers is that they are also hotels. And their need to clean and whiten all of the linen.

Whiteness donates luxury and sophistication and it is associated with purity and relaxation.

Induquim has created an innovative and e**xclusive washing system** focused on treating cruiser linen, sheets, towels, tablecloths, uniforms, etc that are constantly used and need special treatment.

The **Smart Cruise®** washing system cares for the fabrics treated to generate total wellbeing for the passengers and gets the best washing results with maximum savings, profitability and efficiency. Moreover, it respects the environment thanks to its exact dosage, to the noble components that it is made of and to the absence of abrasive, caustic products.

Catering

induquim

induquim

Cleaning and hygiene: the origin of your plates

In the Catering sector cleaning and hygiene are essential to the establishment's prestige. **Induquim**, in this commitment to excellence, is part of your team.

Every establishment in which food is handled and served to the public has a moral responsibility and, of course, extra legal responsibilities. That's why **Induquim** pays so much attention to this sector. Caring for the elements that come into play for an impeccable service means offering products and systems that are extraordinarily clean and hygienic.

Induquim has developed a range of high quality products with noble raw materials that ensure complete satisfaction for both the workers and the consumers: specialised products and systems to cover all the specific needs in a direct and complete way.

Induquim has high quality **"Ready to use"** products and **Massplus® concentrated products** that generate a direct benefit in the results, storage, handling and transport. Always respecting the environment.

Induquim's Personalised Consultancy Service offers professional solutions to improve your business.

- **Kitchens**
- **Bathrooms**
- **Rooms**

Kitchens

Cleaning and disinfecting kitchens

The kitchen is the most important area within the restaurant/catering world. This is where there is the highest amount of material susceptible to cleaning and disinfection. That's why **Induquim** gives it special importance, given that the kitchen is the place where the food, which the customers will eat later on, is stored, handled and prepared.

Induquim has a division that covers all the products and systems required to offer a quality service. The **Masschef® products** include automatic dish washing and brightening products, manual dish washing and degreasing products that cover all the areas in a professional kitchen.

Massplus®

In addition to the specific **"Ready to use"** products for professional Catering, **Induquim** has a division of **Massplus® concentrated products** to optimise resources in terms of use and storage capacity.

Rooms

Cleaning and disinfecting rooms and facilities

High quality products to guarantee an efficient service to your diner. **Induquim** has a large variety of products to cover all the cleaning and disinfecting needs of the rooms and lounges with the **Masslimp® range**, products for floors, disinfectants, general cleaners and air fresheners.

Bathrooms

Cleaning and disinfecting bathrooms

The first impression is what counts and a clean, disinfected and well fragranced bathroom provides the business with added value to the service and the quality of the dishes.

That's why **Induquim** has a complete range of **Masslimp® products** that is specific for bathrooms, which covers all the needs within the professional hotel sector. Likewise, **Induquim** has a wide range of air fresheners with pleasant and long-lasting fragrances.

Masslimp
Floor Care

Masslimp®

Floor Care

A wide range of products to meet all **the cleaning needs on any kind of surfaces**, such as ceramic tiles, stone, wood, parquet, marble or terrazzo floors. These products are always provided with an excellent maintenance and protect the treated surface.

In addition to the extraordinary cleaning, this range of products provides the surface **with a natural brilliance without changing the original colour at all.** They can be adapted depending on the particular application to be suitable for both, cleaning by hand and with automatic scrubbing machines.

When talking about cleaning and sanitizing different surfaces, it is essential to make an appropriate use of quality products taking into account its composition as well as its structure. For this reason, **Induquim** carefully selects and prepares the raw materials to be used so that the finished product is totally in line with the quality expected by the consumer.

In addition, the **Masslimp®** floor maintenance and treatment products are endowed with delicate fragrances, ranging from citric and fruits tones to floral and relaxing scents in order to keep a fresh and lasting aroma.

What are “surfactants”?

AREA TREATED WITHOUT SURFACTANTS

AREA NOT TREATED

The surface tension of water generates droplets on a surface.

All **Induquim** floor cleaners contain **surfactants** that decrease the surface tension of water by breaking the drops so that the product spreads easily and uniformly over the whole surface forming a layer, penetrating into all the pores to grant maximum effectiveness. Therefore, **Induquim** floor cleaners

Terrazzo	Ceramic Stoneware	Porcelain stoneware Polished Granite	Treated Parquet Floor	Floating Wood Floor	Carpets and Rugs

Masslimp
Desinfectants

Masslimp®

Desinfectants

At **Induquim** we understand the importance of disinfection in cleaning processes and that's why one of our product ranges is exclusively focused on disinfection.

Kitchens, dining rooms, surface where food and utensils are handled, develop colonies of microorganisms that are a health hazard and they are commonly present in the raw materials themselves and in the atmosphere, such as: *E. Coli, Staphylococcus Aureus, pseudomonas, Streptococcus*, and others that are very important and dangerous like *Lysteria Monocytogenes*.

For these we have a range of highly powerful degreasing-products for all types of surfaces, both for food use and in the atmosphere.

Biofresh Bac

Masslimp
Hand care

Masslimp®

Hand care

Effective and delicate soaps developed using elements that significantly exceed the tough cosmetic industry's quality control standards. They present **appropriate pH and moisturising agents to clean and hydrate the skin**. Daily use of the hands doing any activity causes continuous deterioration that can be serious in the long term.

Induquim has gone especially for a range of delicate soaps for all kinds of skin.

Lemon, vanilla, rose, coconut and aloe vera are some of the fragrances chosen to give the hands a special touch as well as disinfect and sterilise them.

Liquid soap dispenser

Foam soap dispenser

Masslimp
Air Fresheners

Masslimp®

Air Fresheners

After carefully studying the latest global fragrances, **Induquim**'s **Technical Research and Development Department**, has developed innovative air fresheners that combine the power of deodorisation with long-lasting fresh fragrances.

Bulk **Airmatic** air fresheners fragrance very pleasantly and have been enhanced for the scent to last longer thanks to the high concentration of **Odofresh** and **Odofresh+** developed to freshen and sterilise bathrooms.

The two lines of air fresheners present characteristic fragrances ranging from fruits or flowers to diverse natural aromas.

Airmatic

Deodorising air freshener

The Airmatic air fresheners create a pleasant ambiance in the place where they are used and are able to deodorise the air that is in contact with the product. It incorporates a characteristic fragrance specially studied last

Masswash®

Professional laundry

Induquim Research and Development Department has developed the **Masswash®**, range of latest generation products to solve any professional laundry problem.

Personalised washing systems produce the highest quality and reduce energy, water and personnel costs by respecting the European Union's strict environmental legislation.

Masswash® processes and systems

Induquim offers their clients a **Personalised Complete Advice service** consisting of specialised washing professionals analyze your plants, facilities, products and processes so that you can attain greater productivity.

INDUNET®

LAUNDRY REMOTE CONTROL MANAGEMENT

Remote control laundry management

Latest generation Software developed by **Induquim** to remotely manage, control and follow-up the laundries.

INDUNET allows, in a fast and simple way, continuous monitoring of any installation carried out by **Induquim**.

One more step for **Induquim** and its philosophy to continuously invest in technology and research development.

Traditional process

The efficiency of a washing process is the ratio between the resources used and goals achieved. We normally give great importance to the cost of a detergent, but other factors in the process are very decisive.

4D Max Evolution®

Latest generation direct powder dosage system

PATENTED BY INDUQUIM

- Multi-service equipment to supply both tunnel washers and washing machines in industrial laundries
- Exclusive system for products in the **Masswash®** line
- Doses up to 30% faster than traditional systems
- 100% efficiency
- Easy maintenance
- Precise and controlled dosage
- We cover all the client's needs
- Safety in handling
- Prevents product contamination

4D Evolution®

Revolutionary Predilution System

PATENTED BY INDUQUIM

Wash up to 2.000 kg of linen
with only 10 kg of powder detergent

More for much less
with the innovative predilution system
that has revolutionised
professional laundry

Multi-service equipment adaptable to any laundry

- Save up to 40% on detergent and water costs
- Increase productivity by 25% by simplifying operations
- It occupies 75% less space than traditional systems and without noise
- Exclusive system for the products in the **Masswash®** line

Always obtain excellent washing results thanks to a 100% homogeneous predilution

Alkan
Alkaline activator

Ideal for sterilising hospital clothes. Effective washing in organic dirt processes with no need for soaking, guaranteeing the total removel of bacteria on clothes and from spillages. Medium-soft water.

pH 1%	PERFUME	DENSITY (Kg/l)	SALES FORMATS (KILOS)	PACKAGING
12.0-13.0	CHARACTERISTIC	1.109-1.129	20 KILOS	20 KILOS

Alkan Extra
Total alkaline activator

Special product to wash and disinfect clothes with a lot of organic dirt (hospitals, old people's homes, psychiatrists hospitals). Hard water

pH 1%	PERFUME	DENSITY (Kg/l)	SALES FORMATS (KILOS)	PACKAGING
12.0-13.0	CHARACTERISTIC	1.208-1.228	25	25 KILOS

Deterlav
Fast acting moisturising detergent

Very powerful moisturising detergent for washing all kinds of fabric. Respects and revives the natural colour of the fibres.

0.0-2.0	CHARACTERISTIC	1.090-1.110	25	

Dosage equipment for liquid products

TUNNEL WASHER EQUIPMENT

Pneumatic tunnel equipment with five channels designed to dose chemical products into a tunnel in a wide range of laundries within the industrial market.

Apt to group together different sets of products in a collector per channel with just one assigned destination module.

MULTI-MACHINE EQUIPMENT

One channel pneumatic equipment to dose chemical products into multiple washing machines in a wide range of laundries within the industrial and OPL market.

Considerably reduces dosage time so that the system can administer greater capacity machines.

ELECTROMAGNETIC PUMP MULTI-MACHINE EQUIPMENT

The electromagnetic pump equipment is designed to dose chemical products into multiple washing machines in a wide range laundries within the industrial and OPL market.

Having an electromagnetic pump means that maintenance is more economical as pipes do not have to be changed.

PERISTALTIC PUMP EQUIPMENT

Peristaltic equipment with 3 to 7 pumps designed to dose chemical products into multiple washing machines in a wide range of OPL laundries.

Each product is dosed without backpressure in the collector.

Higiplus Low

Low temperature bleach cleaning detergent

Complete product. Washes, sterilises and bleaches at low temperature in only one operation. Excellent washing results.

pH	PERFUME	DENSITY (Kg/l)	SALES FORMATS (KILOS)	PACKAGING
11.0-12.0	FLORAL	1.552-1.572	20	20 KILOS

Blancol

Active chlorine in powder

Product that releases highly stabilised chlorine for active sterilising and bleaching of fabrics.

pH	PERFUME	DENSITY (Kg/l)	SALES FORMATS (KILOS)	PACKAGING
12.0-13.0	FLORAL	1.090-1.110	10	10 KILOS

Oxitrón

Active oxygen in powder

Product that releases oxygen activated at low temperature for active sterilising and bleaching of fabrics.

pH	PERFUME	DENSITY (Kg/l)	SALES FORMATS (KILOS)	PACKAGING
12.0-13.0	FLORAL	1.150-1.250	10	10 KILOS

Pow

Additive for washing clothes with persistent dirt

Highly alkaline product that removes persistent dirt. Very powerful degreaser.

pH	PERFUME	DENSITY (Kg/l)	SALES FORMATS (KILOS)	PACKAGING
13.0-14.0	FLORAL	1.682-1.702	20	20 KILOS

Neutex

Fabric conditioner in powder

Product designed to remove iron scale during the washing process. Its important reduction power facilitates the bleaching of fabrics.

pH	PERFUME	DENSITY (Kg/l)	SALES FORMATS (KILOS)	PACKAGING
NP	FLORAL	1.190-1.210	10	10 KILOS

Thor

Detergent atomised by active oxygen

Atomised detergent for washing and bleaching all kind of fabrics.

pH	PERFUME	DENSITY (Kg/l)	SALES FORMATS (KILOS)	PACKAGING
10.0-12.0	FLORAL	0.350-0.600	10	10 KILOS

MassFood®

Food Sector

Faced with the challenges presented by the current approach to hygiene in the food industry as established in the EU's complex standard and auditing system, **Induquim's R+D+i Department and its Technical Support Department,** has the complete **Massfood® range** to cover all your cleaning and disinfecting needs in an efficient and safe way.

Induquim's Comprehensive Service

Comprehensive solutions adapted to the specific characteristics of your industry in order to reach optimal levels of hygiene in your facilities, covering risks and needs.

Induquim works alongside you in the implementation through different services. Therefore, we offer:

- **Technical advice on the most suitable products** so that you have the right product in each situation to achieve your goals.
- **Development of specific Hygiene Plans,** defining the cleaning and disinfecting protocol for each room or equipment, how to use the products, effective concentrations, frequency of cleaning and everything that is needed to ensure its correct use.
- **Automation in the cleaning process** through the technical support and availability of a wide range of machinery that allows for C+D efficiency improvements and in the obtained results.
- **Training Courses for the personnel** who carry out the cleaning tasks to ensure they have the correct know-how about how to apply the products.
- **Process consultancy and follow-up,** possibility of microbiological and chemical control of surfaces and atmospheres to validate the hygiene procedures.
- **Development of visible signage** in your facilities.

All of this offered from our deep understanding of the sector, our commitment to put your company at the vanguard regarding health safety. Moreover, in order to guarantee the quality of our products, all of our processes are **ISO 9001:2008 quality standard certified.**

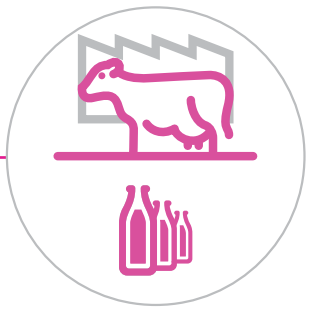
Dairy Industry

Massfood

The manipulation of milk and other dairy products requires **CIP cleaning** of all the pipe systems where the milk flows, as well as cleaning the milking stations (in the primary industry) and cleaning the tanks and cisterns where the milk is stored.

They generate inorganic waste associated with milk stone and based on calcium carbonate that precipitates from the milk and organic waste, both fats and proteins that are usual from the manipulation of animal sourced foods.

In these cases the facilities need:



Acidic products for CIP (descalers antifoam agents) Against inorganic incrustations, like **IA-723** (specific for milk stone), **IA-720** and **IA-730**

Depending on the activity, alkaline-alkaline chlorine detergents for CIP, in order to clean the organic remains **IA-751** or clean and disinfect **IA-700**

On occasions, foaming agents for the storage tanks, to attack dirt remains **I-544**, **IA-745** or alkaline chlorine **IA-701**, **IA-703C**

For filling cleaning, in the case of bottles **IA-746**

Or the disinfection of the CIP systems, with peracetic acid from **IA-709** and **IA-710** are an option

Meat Industry

Massfood

Induquim has a range of specific products for slaughter houses, cutting rooms and industries for meat products and prepared meat products.

The meat industries accumulate a large amount of organic waste like blood, protein remains and fat. It is a productive activity with continuous work in various shifts that often demand intermediate cleaning and thorough cleaning at the end of the productive day.

Moreover, it is essential to clean utensils, knives, conveyor belts,... that normally have wash down equipment to generate foam to clean the surfaces.

The following is **Induquim's range of products**:

Alkaline chlorine products foaming agents for general cleaning and disinfection **IA-701** or **IA-703C** for work surfaces floors, walls using foam generating equipment

Quaternary ammoniums for machinery and rust sensitive areas: **Desingras, Desincol, Deterquat, Biofresh Bac**

Products for temperature controlled chambers, like **Desingras** and specific products for low temperatures like **IA-761**

Peracetic acid for drains and surfaces **IA-709** and **IA-710**

On occasions, acidic descaler for each X time to carry out cleaning of the mineral remains and the chemical product from the repeated cleaning with water and alkali, like **IA-721**

Disinfectant terminal for cutlery and utensils that ensure sterility after cleaning or during storage **Microsan**

Fisheries and Canneries

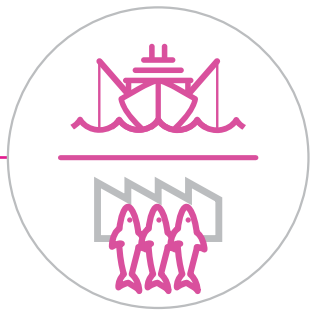
Massfood

Sector that is characterised for generating organic waste like fat, skin, protein remains and oils from the preserves themselves.

An environment with a high accumulation of dirt along with drag waters from the cleaning, make the floors and surfaces very slippery.

Moreover, there may also be the packing from the preserves. It should be borne in mind that there are raw materials for direct consumption being handled so C+D is of vital importance.

Therefore, the need to use the following should be considered:



Alkaline chlorine products foaming agents for general cleaning and disinfection like **IA-701** and **IA-703C**

Specific products for the tinplate of the preserves **IA-746**

Disinfectant terminal for cutlery and utensils **Microsan**

Peracetic acid for drains (high listeria risk) **IA-709** and **IA-710**

Product for temperature controlled chambers like **Desingras** and specific products for low temperatures like **IA-761**

For large surfaces, non-foaming products for floor cleaning machine like **I-569**

Bakery Industry

Massfood

This is an industry characterised by its large amount of organic waste. High amounts of fat (from the products they make and from greasing the trays to prevent sticking in the oven), burnt fat in the ovens, burnt carbohydrates and sugars, as well as flour.

Important to remove the flour remains before using water to prevent the formation of paste.

Therefore, with these characteristics, it is necessary to use the following:

Alkaline detergents **I-544** or Alkaline chlorine for cleaning and disinfecting like **IA-701** and **IA-703C**

Peracetic acid for drains **IA-710**

Multiuse degreaser for burnt fat in the ovens and on the trays, like **Storm, Thunder, Gale** or **Multigras**

Quaternary ammoniums for sensitive machinery, pipes or piping systems and nozzles where caramel flows, or other products like cream, **Desincol**

Disinfectant terminals for utensils **Microsan**

Wineries

Massfood

Wine production generates different types of waste depending on whether we are talking about the harvesting tools, the vats and wine recirculation systems, the fermentation barrels or the general cleaning of the facilities.

This is a high quality sector with a lot of exports, with specific limitations like the danger of producing odours that stay in the wines or the need to eliminate the reddish hue of the grape or to remove the tartaric remains that precipitate from the tanks. Therefore, products with different characteristics are necessary:

- foam products for the general cleaning of the facilities, surfaces, floors, exterior of the tanks, harvesting elements...
- anti-foaming agents that facilitate CIP cleaning in the tanks and pipes

- alkaline that eliminate tartaric remains
- acids that eliminate mineral incrustations
- oxidising products that help to eliminate the reddish colour of the grapes from the facilities
- disinfectant solutions that ensure the innocuousness of the produced product

Therefore, the use of the following should be considered:

Non-foaming alkaline detergents for CIP that help to remove the organic remains of the grape and the tartaric **IA-751**

Acid descaler non-foaming for CIP that help to remove mineral incrustations **IA-730**

Disinfectant detergents alkaline chlorine for general cleaning and disinfection of the facilities like **IA-701** or **IA-703C**

Disinfectant detergents Alkaline chlorine non-foaming to clean and disinfect the CIP system like **IA-700**

Peracetic acid to sanitise the CIP and to eliminate the reddish pigments of the grape **IA-710**

Slightly alkaline degreaser for sensitive surfaces **IA-748**

Beer Industry

Massfood

The elaboration of beer generates a series of specific dirt, especially protein remains, tannins, oils and carbohydrates, as well as inorganic remains like oxalate, which produces "milk stone".

For the correct cleaning of these types of industries the following may be needed:

Alkaline non-foaming agents for CIP that help to remove the organic remains of oils, carbohydrates and tannins **IA-751**

Acid descaler non-foaming for CIP that help to remove oxalate incrustations and other mineral remains **IA-730**

Disinfectant detergents alkaline chlorine for the general cleaning and disinfection of the facilities **IA-701** or **IA-703C**

Disinfectant detergents alkaline chlorine non-foaming to clean and disinfect the CIP system like **IA-700**

Peracetic acid in the case of opting to use this product **IA-710**

Fruits and vegetables

Massfood

In the fruit and vegetable storage process, cleaning is not usually a well developed factor due to the fact that they are not handled much. Normally, cleaning is focused on the chambers, the boxes and on the conveyor belts, where very basic protocols are carried out, except when handling products from the pre-prepared or pre-cooked range (which entails greater handling and product packaging). For the cleaning and disinfection of these industrial units the following are normally used:

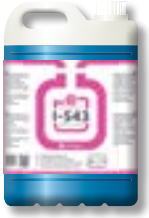
Alkaline foam detergents **IA-751** or alkaline chlorine foaming agents **IA-703C** for the general cleaning and disinfection and for the boxes

Disinfectant detergents based on quaternary ammonia to clean the conveyor belts classifiers, processing machinery... where the foods pass **Desincol**

Transport

To disinfect the aluminium trailers of the transport vehicles, quaternary ammoniums are necessary, like **Desincol, Deterquat** or alkaline detergents with a disinfectant terminal.
Be careful with the chlorine as it generates rust on the aluminium.

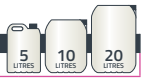
Massfood Food Sector



I-543
Foaming degreaser

Specially for the removal of all kinds of grease when hosing down as its foam sticks to vertical surfaces. The product consequently spends more time in contact with the dirt.

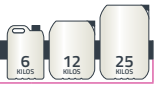
pH 1%	PERFUME	DENSITY (Kg/l)	SALES FORMATS (LITRES)			PACKAGING
11.0-13.0	CHARACTERISTIC	1.014-1.034	5	10	20	



I-544
Powerful foaming degreaser

Powerful degreasing product. Contains special surfactants that dissolve grease and protein residues easily. Includes foam activating products, being its application appropriate in foam generators for hosing down in the food processing industry.

pH 1%	PERFUME	DENSITY (Kg/l)	SALES FORMATS (KILOS)			PACKAGING
11.5-13.5	CHARACTERISTIC	1.177-1.197	6	12	25	



IA-700
Chorinated disinfectant detergent

Chorinated product designed to clean and disinfect in CIP systems thanks to its non-foaming components. Contains special surfactants that dissolve grease and protein residues easily.

pH 1%	PERFUME	DENSITY (Kg/l)	SALES FORMATS (LITRES)		PACKAGING
12.0-14.0	CHARACTERISTIC	1.200-1.220	10	20	

IA-701
Foaming chlorinated disinfectant detergent

Powerful degreaser and disinfectant for cleaning and disinfecting very greasy and limescaled surfaces on which conventional products do not work. Ideal for hosing down due to its great foaming capacity.

pH 1%	PERFUME	DENSITY (Kg/l)	SALES FORMATS (LITRES)		PACKAGING
11.5-13.5	CHARACTERISTIC	1.141-1.161	10	20	

IA-703C
Chlorinated disinfectant cleaner

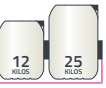
Product designed to clean and disinfect very greasy and limescaled surfaces. Foams very well.

pH 1%	PERFUME	DENSITY (Kg/l)	SALES FORMATS (KILOS)		PACKAGING
10.5-12.5	CHARACTERISTIC	1.038-1.058	10	20	

IA-745
Self-foaming caustic detergent

Very powerful foaming product to remove strong dirt and scale produced by animal fat, vegetables, proteins and fats.

pH 1%	PERFUME	DENSITY (Kg/l)	SALES FORMATS (KILOS)		ENVASE
11.5-13.5	CHARACTERISTIC	1.210-1.230	12	25	



IA-747

Detergent for stubborn surfaces

Slightly alkaline product specially designed to clean floors, walls, food preparation surfaces and equipment as well as plastics and soft metals such as aluminium. Ideal product for soaking or washing by hand.

pH	PERFUME	DENSITY (Kg/l)	SALES FORMATS (LITRES)		PACKAGING
11.5-13.5	CHARACTERISTIC	1.013.1.033	10	20	

IA-748

Concentrated slightly alkaline detergent

Concentrated powerful degreaser especially on porous surfaces thanks to its penetrating power. Includes surfactants that dissolve dirt. Recommended for cleaning equipment and utensils as well as floors, walls and many work surfaces.

pH	PERFUME	DENSITY (Kg/l)	SALES FORMATS (LITRES)		PACKAGING
8.0-10	CHARACTERISTIC	1.014-1.034	10	20	

Massfood Food Sector

IA-721
Foaming acid descaler and degreaser

Product for cleaning dried grease on which conventional products do not work. Special composed of acids that hydrolise the grease and surfactants that dissolve easily. Suitable for removing mineral and protein scale deposits and grease.

pH 1%	PERFUME	DENSITY (Kg/l)	SALES FORMATS (LITRES)		PACKAGING
1.0-3.0	CHARACTERISTIC	1.170-1.190	10	20	

Microsan
Terminal disinfectant

Product designed with ingredients based on quaternary ammonium salts. Wide ranging terminal disinfectant. Product suitable for plants, equipment, installations and utensils. Powerful disinfection without leaving residues, smells or a fragrance.

pH	PERFUME	DENSITY (Kg/l)	SALES FORMATS (LITRES)			PACKAGING
7.0-9.0	ODORLESS	0.974-0.994	5	10	20	

Deterquat
Detergent for disinfecting utensils and equipment

Product designed with ingredients based on quaternary ammonium salts to clean and disinfect surfaces, equipment, and utensils. Very powerful removal of dirt due to its low alkaline active principles and surfactants. It does not harm the surface treated.

pH 1%	PERFUME	DENSITY (Kg/l)	SALES FORMATS (LITRES)			PACKAGING
9.5-11.5	ODORLESS	1.021-1.041	5	10	20	

Desingras
Fast acting disinfectant and detergent

Product formulated to clean and disinfect hard surfaces (tables, counters, worktops, tiles, etc.). Suitable for surfaces on which water-based products are inappropriate. This product disinfects quickly.

pH	PERFUME	DENSITY (Kg/l)	SALES FORMATS (LITRES)				PACKAGING
9.0-11.0	ODORLESS	0.984-1.004	750 cc	5	10	20	

Desincol
Disinfectand and detergent for surfaces

Product specially formulated to disinfect utensils and any surface. A powerful concentrated deodoriser including surfactants so it removes accumulated dirt easily. Product suitable for use in the food processing industry.

pH	PERFUME	DENSITY (Kg/l)	SALES FORMATS (LITRES)			PACKAGING
12.0-13.5	ODORLESS	1.006-1.026	5	10	20	

Biofresh Bac
General disinfectant and cleaner

Product with long-lasting triple action: polishes, disinfects and fragrances. Combines disinfection and polishing with cleaning of the surface all with pleasant fragrancing of all the surrounding environment. Includes surfactants and solvents to dissolve the dirt. For all hard surfaces such as floors, tables, desks, tiles, etc.
Suitable for use in the food processing industry.

pH	PERFUME	DENSITY (Kg/l)	SALES FORMATS (LITRES)				PACKAGING
6.0-8.0	CITRIC	0.977-0.997	1	5	10	20	

IA-719
Atomising sanitizer

Spray product designed to sterilise surfaces in the food processing industry. Alcohol based, evaporates quickly and with no need for rinsing. Ideal for use on surfaces for which water-based solutions are inappropriate or in areas which are difficult to access.

pH	PERFUME	DENSITY (Kg/l)	SALES FORMATS (LITRES)				PACKAGING
7.0-9.0	CHARACTERISTIC	0.951-0.971	750 cc	5	10	20	

IA-751
Non-foaming caustic detergent

Non-foaming product specially designed for removing organic dirt in a wide range of applications such as washing bottles, CIP systems and spraying systems. Prevents formation of scaling.

pH 1%	PERFUME	DENSITY (Kg/l)	FORMATO (LITRES)	ENVASE
12.0-14.0	CHARACTERISTIC	1.455-1.475	20	

IA-720
Neutralising circuit cleaner

Powerful highly effective product composed of an acid mixture that removes grease, protein residues and inorganic dirt when cleaning by hand, soaking or using CIP systems. Contains moisturisers that facilitate access of the product to dirt and further rinsing.

pH 1%	PERFUME	DENSITY (Kg/l)	FORMATO (LITRES)	ENVASE
1.0-3.0	CHARACTERISTIC	1.408-1.428	20	

IA-730
Acid detergent for CIP

Highly effective descaler for removing difficult dirt and scaling in the food and drinks industry using CIP systems.

pH	PERFUME	DENSITY (Kg/l)	FORMATO (KILOS)	ENVASE
0-2	CHARACTERISTIC	1.267-1.287	25	

IA-723
Acid descaler

Product formulated to remove inorganic scale in CIP applications in the food and drinks industry. Ideal for removing beerstone residues. Its low foaming components make it suitable for cleaning in cnditions of high pressure and turbulence.

pH	PERFUME	DENSITY (Kg/l)	FORMATO (KILOS)	ENVASE
1.0-3.0	CHARACTERISTIC	1.202-1.222	25	

IA-709
15% peracetic acid based sanitizer

Product designed to clean and sterilise in the textile and food processing industries. Powerful oxidising action for stain removal. Ideal for automatic dosing in CIP systems using both hard and soft water. Product contains very powerful microbicide action.

pH	PERFUME	DENSITY (Kg/l)	FORMATO (KILOS)	ENVASE
0.0-2.0	CHARACTERISTIC	1.140-1.160	25	

Massfood Food Sector

IA-710
5% peracetic acid based sanitizer

Product designed to clean and sterilise in the textile, milk and food processing industries. Powerful oxidising action for stain removal. Ideal for automatic dosing in CIP systems using both hard and soft water.

pH	PERFUME	DENSITY (Kg/l)	FORMATO (KILOS)	ENVASE
0.0-1.0	CHARACTERISTIC	1.090-1.110	25	25 KILOS

IA-715
Tunnel detergent for soft water

Product suitable for removing organic residues, proteins, albumin, etc. on baking tins, boxes and trays by means of cleaning tunnels. Contains lime sequestrant and magnesium in the water to avoid limescale in nozzles, elements and piping. Ideal for soft water.

pH	PERFUME	DENSITY (Kg/l)	SALES FORMATS (KILOS)			PACKAGING
12.0-13.5	CHARACTERISTIC	1.180-1.200	6	12	25	6 KILOS, 12 KILOS, 25 KILOS

IA-716
Tunnel detergent for hard water

Product suitable for removing organic residues, proteins, albumin, etc. on baking tins, boxes and trays by means of cleaning tunnels. Contains lime sequestrant and magnesium in the water to avoid limescale in nozzles, elements, and piping. Ideal for very hard water.

pH	PERFUME	DENSITY (Kg/l)	FORMATSO (KILOS)			PACKAGING
12.0-13.5	CHARACTERISTIC	1.258-1.278	6	12	25	6 KILOS, 12 KILOS, 25 KILOS

IA-746
Detergent for exterior wash of glass and tin containers

Product specially designed to wash the outside of containers in the vegetables and preserves industries. very effective product in removing grease and inorganic dirt. Thanks to being low foaming it can be used in CIP applications by hand with excellent results.

pH	PERFUME	DENSITY (Kg/l)	SALES FORMATS (LITRES)		PACKAGING
11.5-14.0	CHARACTERISTIC	1.133-1.153	10	20	10 LITRES, 20 LITRES

IA-761
Detergent for cold storage room

Product specially designed to clean walls and floors in cold stores. Designed for application by hand as well as using scrubbing machines.

pH	PERFUME	DENSITY (Kg/l)	SALES FORMATS (LITRES)			PACKAGING
7.5-8.5	CHARACTERISTIC	0.997-1.017	5	10	20	5 LITRES, 10 LITRES, 20 LITRES

Floormaq
Floor cleaner for machines

Powerful product for cleaning industrial floors using automatic machines. Includes active components to remove all dirt, including the worst scaling. Leaves all surfaces intact without damaging them at all. Non-foaming.

pH	PERFUME	DENSITY (Kg/l)	SALES FORMATS (LITRES)			PACKAGING
11.25-12.75	CHARACTERISTIC	1.059-1.079	5	10	20	5 LITRES, 10 LITRES, 20 LITRES

Floormaq DG

Degreasing floor cleaner for machines

Powerful product for cleaning industrial floors using automatic machines. Its formula contains a large number of solvents so that it removes dirt and grease effortlessly. Leaves all surfaces intact without damaging aluminium or metal surfaces at all.

pH	PERFUME	DENSITY (Kg/l)	SALES FORMATS (LITRES)			PACKAGING
7.5-9.5	CHARACTERISTIC	1.003-1.023	5	10	20	

I-569

Disinfectant floor cleaner for machines

Poduct specially formulated to disinfect, clean and deodorise floors and industrial environments. No need to rinse.

pH	PERFUME	DENSITY (Kg/l)	SALES FORMATS (LITRES)			PACKAGING
8.0-10.0	CHARACTERISTIC	1.049-1.069	5	10	20	

DF Bac

Unscented sanitizing hand gel

pH neutral product sterilising and protecting the hands. Its pH and the inclusion of protective agents moisturises the hands and avoids irritation. Being unfragranced, it is ideal for the food processing industry.

pH	PERFUME	DENSITY (Kg/l)	SALES FORMATS (LITRES)			PACKAGING
5.5-6.5	ODORLESS	1.008-1.028	5	10	20	

Hydrogel

Hydroalcoholic hand gel

Product for cleaning and sterilising the hands with no need for rinsing. The product spreads on the hands and cleans, disinfects and dries instantaneously.

pH	PERFUME	DENSITY (Kg/l)	SALES FORMATS (LITRES)			PACKAGING
6.0-8.0	ODORLESS	0.872-0.892	5	10	20	

Natural foamer

Portable tank for manual generation of foam in small areas like kitchens and bakeries.

Foam cannon

Tank of 24 or 50 LITRES with compressed air connection to foam simple facilities where large amounts of water are not required.

Satellite cleaning

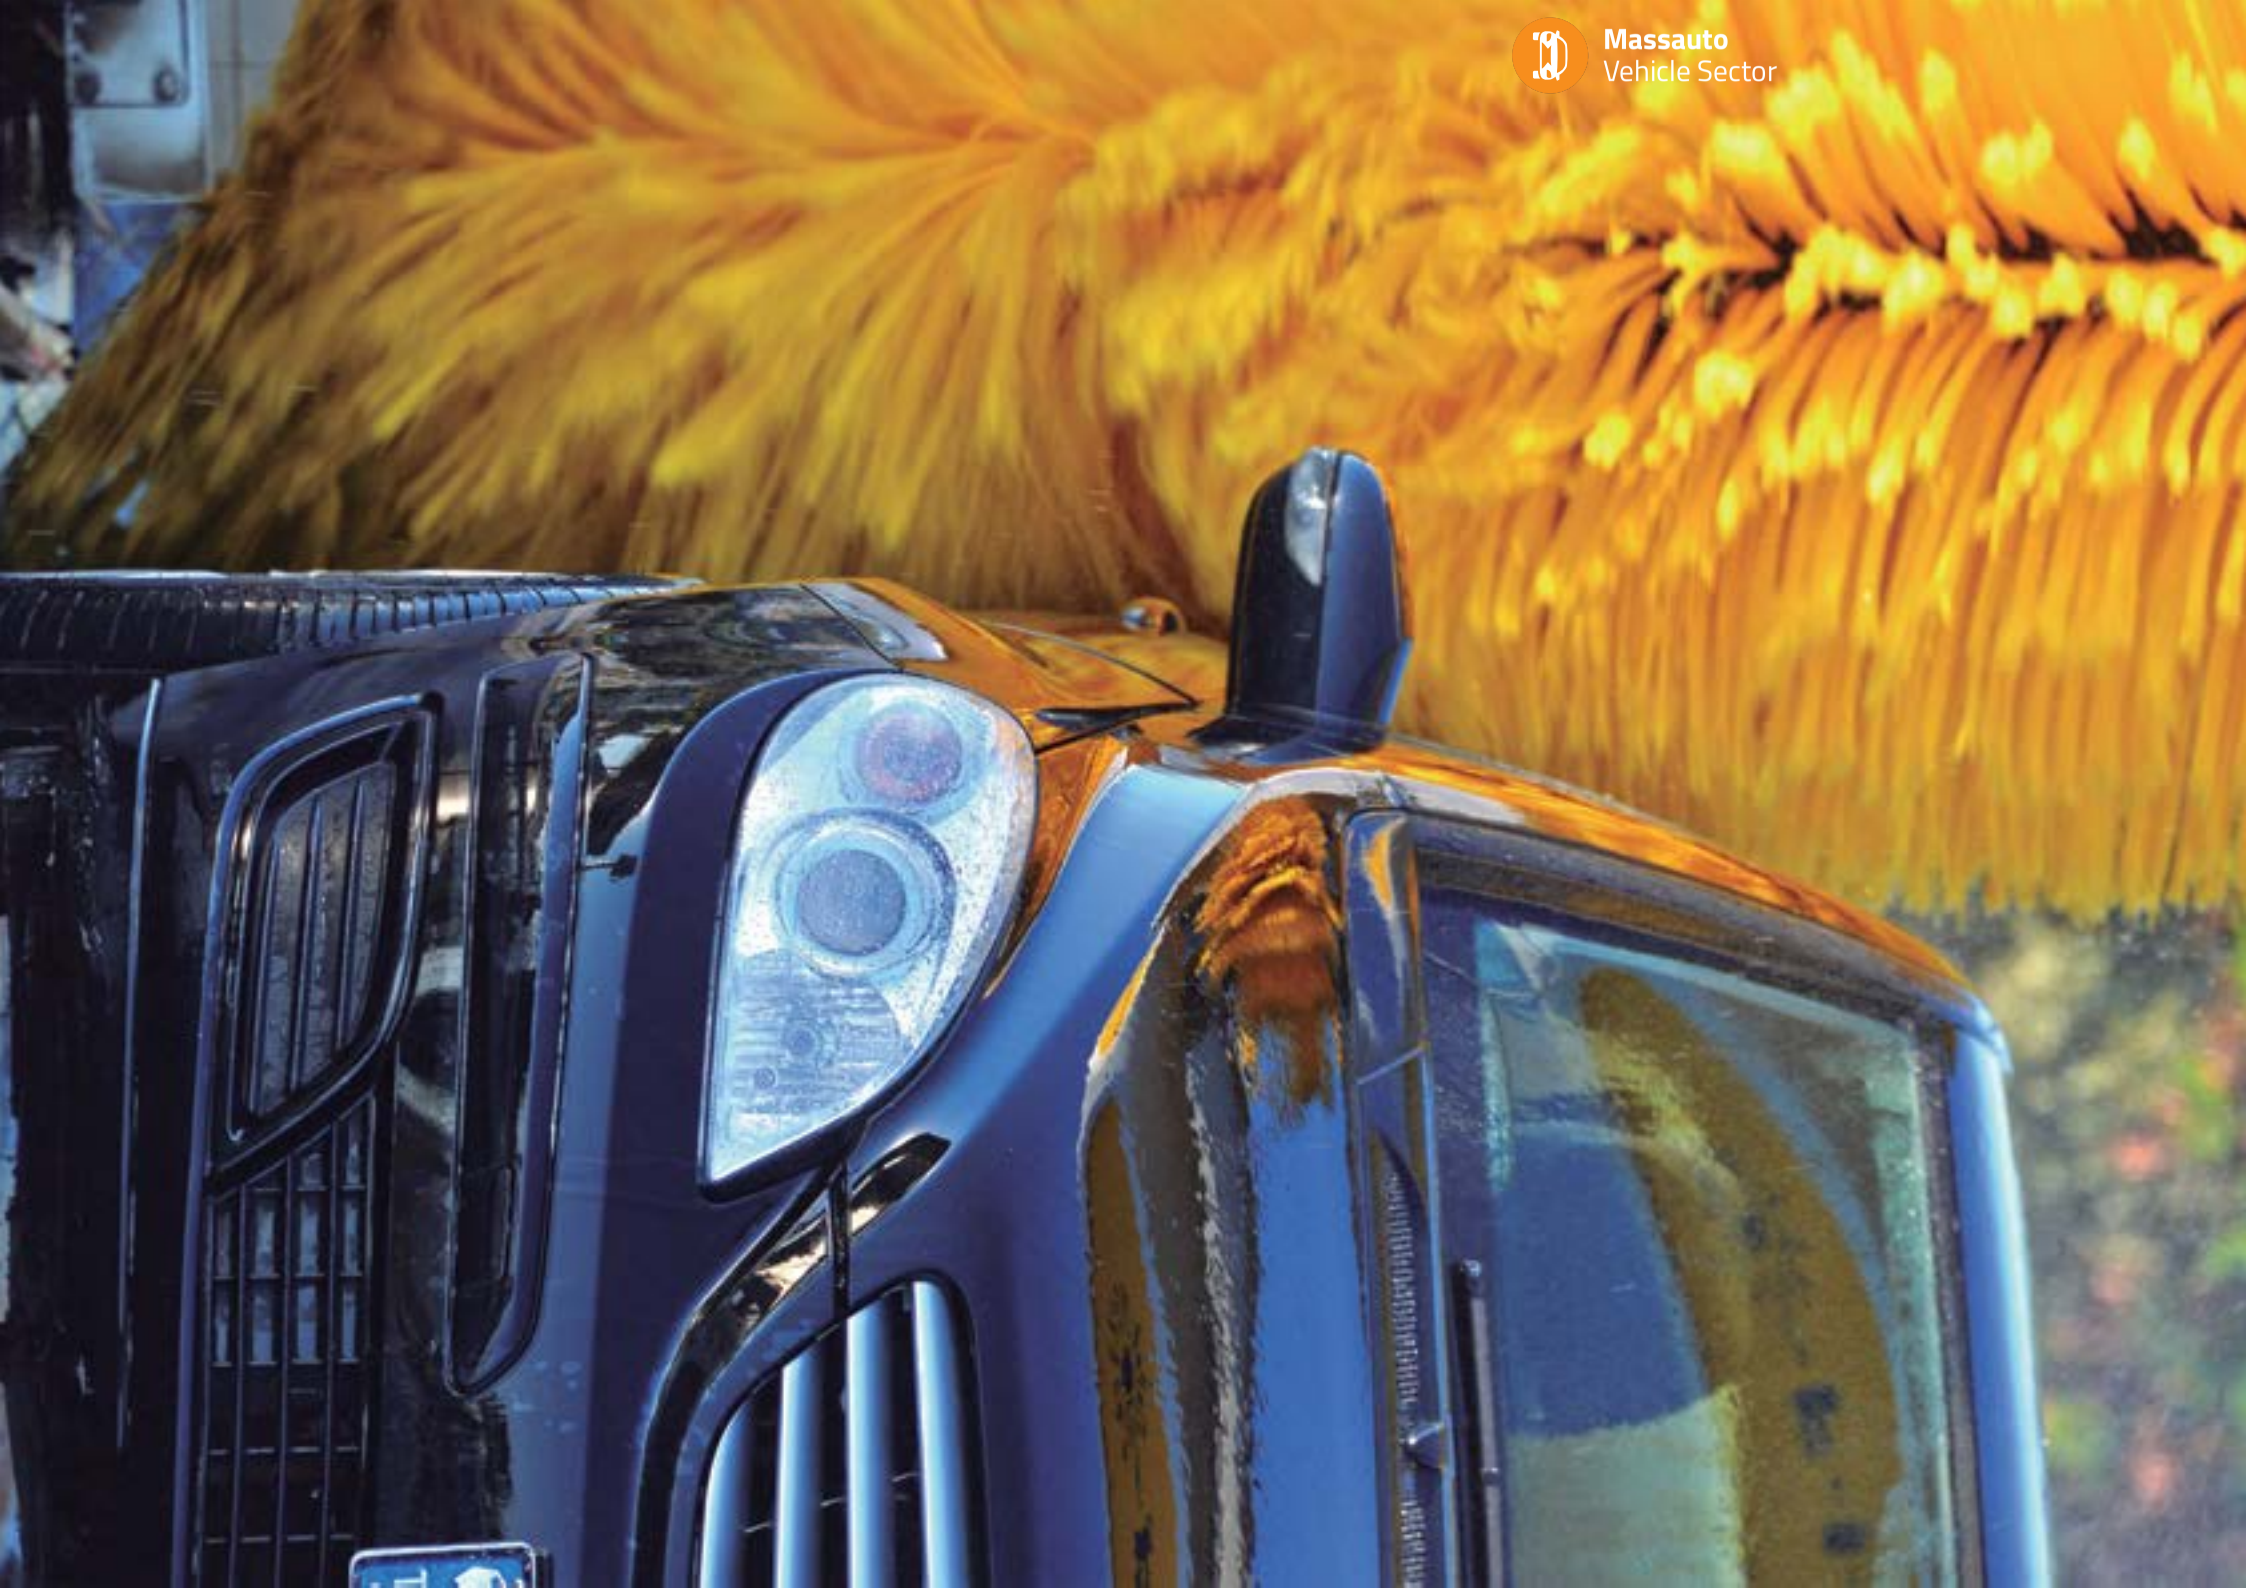
Wall unit with network water connection and to compressed air in order to foam and rinse at low and medium pressure.

Satellite mobile

Mobile cleaning unit that allows you to foam and rinse with network pressure while moving around the facilities.

Booster GRI 5

Network water over-pressure equipment that allows C+D to 20 bars (medium pressure), improving the cleaning results in large facilities.



Massauto®

Vehicle Sector

Induquim has a wide range of products to clean and maintain every kind of vehicle. We offer a product for each need, exterior and interior cleaning, with delicate cleaning of all parts of the vehicle and excellent results.

All of the fragrances used in automobile interior cleaning products have been carefully developed to provide a pleasant and unmistakable long lasting aroma.

There are products for all kinds of dirt and stains in this field. We offer detergents for bodywork, wheel polishers, windscreen washers, insect repellents, surface degreasers, etc. All of these provide a full service of unbeatable quality. This product range guarantees durability and maintenance so spending less money is also guaranteed.

Dry EX

Vehicle bodywork cleaner **without water**

Concentrate with latest generation waxes and silicon to clean all types of bodywork without having to use water. Its high quality ingredients offer a protective layer that delays the adhesion of dirt and facilitates posterior cleaning.

pH	PERFUME	DENSITY (Kg/l)	SALES FORMATS (LITRES)			PACKAGING
10.0-12.0	CHARACTERISTIC	0.982-1.002	750 ml	5	20	

Shampoo PRE

Vehicle bodywork prewash detergent

A-411E

Highly effective product for pre-washing vehicles at the entrance to cleaning tunnels. Does not attack the paintwork or rubber parts.

pH 1%	PERFUME	DENSITY (Kg/l)	SALES FORMATS (LITRES)			PACKAGING
10.5-12.5	CHARACTERISTIC	1.048-1.068	5	10	20	

Shampoo CR

Vehicle bodywork shampoo

A-410

Concentrated product specially designed for washing the bodywork of cars, lorries, buses and trailers in a cleaning tunnel or manually. Contains glycoles and surfactants that dissolve the grease and oil so that it cleans and moisturises in order for the product to access the dirt and the remains of insects stuck on surfaces and remove them easily.

pH	PERFUME	DENSITY (Kg/l)	SALES FORMATS (LITRES)			PACKAGING
7.0-8.0	CITRIC	1.017-1.037	5	10	20	

Shampoo AE

Shampoo with foam activator

A-412

Product suitable for washing lorries, buses, coaches, trailers, etc. in the cleaning tunnel or manually. For cleaning engines, inside the passenger compartment, bodywork, etc. Does not attack the vehicle's paintwork or its rubber parts. Very concentrated and foams well.

pH	PERFUME	DENSITY (Kg/l)	SALES FORMATS (LITRES)			PACKAGING
9.0-11.0	CITRIC	1.019-1.039	5	10	20	

Box L

Vehicle bodywork cleaner for pits

A-411

Powerful vehicle bodywork cleaner for cleaning tunnel boxes. Removes all dirt effortlessly and avoids rubbing harmful to the vehicle's paintwork. Does not harm any part of the vehicle.

pH 1%	PERFUME	DENSITY (Kg/l)	SALES FORMATS (LITRES)			PACKAGING
10.5-12.5	CHARACTERISTIC	1.101-1.121	5	10	20	

Box S

Vehicle bodywork cleaner for pits in powder

Rapid dissolving bodywork cleaner for cleaning tunnel boxes. Removes all dirt effortlessly and avoids rubbing harmful to the vehicle's paintwork. Does not harm any part of the vehicle.

pH	PERFUME	DENSITY (Kg/l)	FORMATO (KILOS)	ENVASE
NP	LIME		SACO 5 KG	

Shampoo EN

Powerful industrial vehicle cleaner

A-413C

Product specially designed for cleaning the bodywork of cars, lorries, buses, coaches, lorry cabins, vans, minibuses etc. in automatic and hand washing installations. Does not harm paintwork. Very concentrated with powerful antistatic properties so ideal for washing motorbikes.

pH 1%	PERFUME	DENSITY (Kg/l)	SALES FORMATS (LITRES)			PACKAGING
10.5-12.5	CHARACTERISTIC	1.100-1.120	5	10	20	

Hydrocer
Tunnel water repellent wax
A-422

Slightly alkaline product ideal for rinsing in cleaning tunnels. Does not harm paintword and rubber containing parts. Contains cations that make the product a powerful cleaner and neutralises the action of washing products. Its sequestrant ingredients set up the rinsing water by removing any limescale. Powerful water repellent, decreases the surface tension forming larger drops of water that are removed more easily. Contains amphoterics that improve the bodywork's shine. Facilitates the drying of the bodywork.

pH	PERFUME	DENSITY (Kg/l)	SALES FORMATS (LITRES)			PACKAGING
3.5-4.8	CHARACTERISTIC	0.986-1.006	5	10	20	

Desoil PF
Powerful fragranced cleaner
A-414

Powerful product for cleaning all floors and internal surfaces of an automobile (sunroofs, dashboards, mouldings, etc.). Does not harm PVC, rubber, cement, asphalt, etc. surfaces.

pH 1%	PERFUME	DENSITY (Kg/l)	SALES FORMATS (LITRES)			PACKAGING
10.0-12.0	MENTHAL PINE	1.047-1.067	5	10	20	

Desoil XP
Low foaming surface degreaser
A-414L

Product suitable for cleaning inside vehicles (seats, sunroofs, dashboards, etc.). Its latest generation components penetrate the dirt without foaming. It does not harm PVC, vynil, linoleum or rubber surfaces. Suitable for cleaning with automatic scrubbing machines when the surface dirt has become encrusted.

pH 1%	PERFUME	DENSITY (Kg/l)	SALES FORMATS (LITRES)			PACKAGING
10.0-12.0	CHARACTERISTIC	1.055-1.075	5	10	20	

Autotal
Super powerful degreaser
A-432

Designed to remove all kinds of oil and grease in mechanical repair shops, petrol filling stations, etc. Does not attack the vehicle's paintwork. Removes grease from filters, engines, bodywork, floors, tiles, tools, worktops, etc. Contains alkaline components that together with other components work powerfully against dirt but are gentle on the surface.

pH 1%	PERFUME	DENSITY (Kg/l)	SALES FORMATS (LITRES)			PACKAGING
10.5-12.0	CHARACTERISTIC	1.055-1.075	5	10	20	

Gum
Chewing gum and sticker adhesive remover
A-438

Product composed of totally natural solvents obtained from citric extracts and used for removing stickers and chewing gum from any surface. Do not apply to rubber or plastic surfaces that are not resistant to solvents.

pH	PERFUME	DENSITY (Kg/l)	SALES FORMATS (LITRES)		PACKAGING

Massnature
Ecological products

Massnature®

Ecological products

Induquim assigns a prominent place in its product ranges that cannot but be dedicated to the **environment**.

We at **Induquim** firmly believe in **corporate social responsibility** of companies so we have developed a product line with **European Union ECOLABEL certification** minimising its environmental impact and meeting environmental requirements.

Advantages of ECOLABEL certification:

- We can let our clients know that our products are more environmentally friendly than others with similar func-tions and specifications.
- This is a public label compatible with other national systems of ecological labelling and is valid and recognised in all Member States of the European Union, irrespective of in which country said certification has been obtained.
- The ecological criteria established to get the certification are decided objectively by official public organisations as they are not subject to commercial pressure.
- The label shows verified information about the environmental impact of the product throughout its life.

In addition to achieving other ecological requirements (raw materials used, concentrations, specification of containers...), this label is only granted to products that guarantee at least a similar efficiency compared to conventional products. **Induquim** has carried out tests with respect to its formulations at certified laboratories in order to prove said efficiency before the competent bodies.
