Mastering the art of cleaning requires the right tools.

Ettore Steccone invented the window squeegee over eighty years ago in Oakland, California. His T-shaped tool, manufactured of brass with a single precision slit rubber blade, dried windows virtually streak-free and became the new standard in cleaning glass.

Today, his family still runs this small independently owned company and continues his legacy by bringing quality products, not only to the professional, but to homeowners around the world. The spirit to innovate and discover new and better ways to clean is alive and well at Ettore Products Company. As we inspire professionals to master the art of cleaning, our goal is to remain at the forefront of innovation and continue to produce the finest cleaning tools available.

Aquaclean Pure Water Systems

AQUACLEAN

Three Cartridge Filtration System

The Aquaclean system is designed to reduce the maintenance and cost in manufacturing pure water. Pretreatment cartridge, Reverse Osmosis and a De-Ionization. We have created the ultimate system that requires the least filter replacement than anything else on the market.

Step 1. Tap water flows into the Carbon/KDF prefilter to begin the anti-scaling process and remove chlorine in the water supply.

Step 2. The Reverse Osmosis Membranes separate water and remove 92% to 95% of total dissolved solids.

Step 3. The De-Ionization Cartridge removes the remaining total dissolved solids, producing water that is 99.99% pure.

New Aquaclean Poles

Unlock the power of the new gold standard in water-fed poles.

The all new Aquaclean Carbon Fiber Pole is the most powerful water-fed pole you can buy. The revolutionary Carbon Fiber design provides greater rigidity at longer lengths than any other pole on the market, allowing for effortless brush control. Each pole has an aluminum outer tube that adds strength when extended and protects the carbon fiber inner poles when fully retracted. It's easy to transport, even in small vehicles.

The new Multifunction Clamping System positively locks each section, preventing unintended pole collapse. The ergonomic design of the locking tabs minimizes fatigue and are engineered for long lasting performance. Each clamp has a tapered bottom that eliminates pinch points and prevents the pole from getting caught on window sills and branches. And replacement pole sections easily bolt on—no more gluing sections together.

Locks are not
glued so they
can be easily
replaced

New clamp design has
positive locking tabs
that won't release
unintentionally

Each clamp has a
tapered bottom to
prevent snags and
keeps the clamps
separated to prevent
pinch points

Durable endcap
protects the end
of the pole and
features a side
hose aperture
that prevents
kinks.

our six pole
length options,
